C++ | JavaScript | NodeJS | MongoDB || Solidity | MySQL | Git

Work Experience

Accenture | Developer Virtual Experience Program

March'23 - April'23

- Gained hands-on experience in software engineering concepts, including agile methodologies and project management best practices.

Walmart | Advanced Software Engineering Program

April'23

- Enhanced skills in data analysis, process automation, and system optimization through project-based learning.
- Received feedback on code quality and adherence to industry standards from experienced mentors.

Projects

E-Commerce Website

July'22

- Designed and developed a Java-based e-commerce platform with a product catalog, shopping cart, user authentication, and administrative dashboard using Java, NetBeans, and WAMP server.
 - Conducted extensive testing and debugging to ensure the platform achieved 95% uptime and optimized performance.
- Deployed and hosted the project in a local environment using WAMP server, simulating real-world e-commerce scenarios.

Internship

Nagar Nigam Lucknow | Research and Design

May'23 - August'23

- Conducted comprehensive research on waste management strategies, focusing on optimizing recycling processes and minimizing landfill dependency.
- Collaborated with local authorities and stakeholders to implement actionable solutions, resulting in a 15% improvement in the city's waste recycling rate. Utilized tools such as MS Excel for data analysis and visualization, enhancing the decision-making process for waste management reforms.

Academic and Extracurricular Achievements

- Awarded a Certificate of Recognition for outstanding contributions as a volunteer during the UP Zonal Event organized by IIT Roorkee and Cognizance. Gained valuable experience in event management, teamwork, and problem-solving in a high-pressure environment.

January'24

Certificates

Google | The Fundamentals of Digital Marketing

October'22

- Acquired expertise in digital marketing strategies, SEO, social media marketing, and online advertising fundamentals.

AICTE And EDUNET Foundation | Data Analytics

June'23- July'23

- Successfully completed the Data Analytics Course by Google, demonstrating proficiency in analyzing data, creating dashboards, and generating actionable insights to support decision-making.

Google | Advanced Google Analytics

January'23

- Mastered advanced analytics techniques to interpret data and optimize website performance effectively.
